CONTENTS VOLUME 71 OCTOBER 1984

page 1 WARREN, R. H. Axonal microtubules of crayfish and spiny lobster nerve cords are decorated with a heat-stable protein of high molecular weight

17 CURTIS, A. S. G. and FORRESTER, J. V. The competitive effects of serum proteins on cell adhesion

37 LONERGAN, T. A. Regulation of cell shape in *Euglena gracilis*. II. The effects of altered extra- and intracellular Ca^{2+} concentrations and the effect of calmodulin antagonists

51 KNOX, P. Kinetics of cell spreading in the presence of different concentrations of serum or fibronectin-depleted serum

61 DOCHERTY, R. J., EDWARDS, J. G., GARROD, D. R. and MATTEY, D. L. Chick embryonic pigmented retina is one of the group of epithelioid tissues that lack cytokeratins and desmosomes and have intermediate filaments composed of vimentin

75 ŠEVALJEVIĆ, L., PETROVIĆ, M., POZNANOVIĆ, G., ŠKARO, A. and PANTELIĆ, D. Structural and biochemical aspects of liver cell nuclear organization in normal and scalded rats

95 HATTORI, R., ISHIMARU, Y., KURANO, R. and HAYASHI, H. An immunoelectron microscopic study on the distribution of a cell surface-associated adhesive glycoprotein synthesized by rat ascites hepatoma cells

111 SCHUBERT, I., RIEGER, R. and DÖBEL, P. G and/or C-bands in plant chromosomes

121 MEIER, R., LEFORT-TRAN, M., POUPHILE, M., REISSER, W. and WIESSNER, W. Comparative freeze-fracture study of perialgal and digestive vacuoles in *Paramecium bursaria*

141 ECCLES, M. H. and GLAUERT, A. M. The response of human monocytes to interaction with immobilized immune complexes

159 STACK, S. M. Heterochromatin, the synaptonemal complex and crossing over

177 GRONOWICZ, G., SWIFT, H. and STECK, T. L. Maturation of the reticulocyte *in vitro*
